Built for every fleet

One platform, tuned to how you move people and goods. EduBB adapts to logistics carriers, travel operators, rental businesses and schools — so every team gets the tracking, trips and cost control that matter to them.

Logistics

Move goods on time and control cost per kilometre. Track your entire fleet live, manage trips and drivers, and stay on top of fuel, maintenance, tyres and compliance from one dashboard.

- Real-time fleet GPS tracking
- Trip, consignment & driver assignment
- Fuel, tyre & maintenance cost control
- Cost-per-km & utilisation analytics

Travels & Charters

Run tours, staff transport and charters profitably. Plan trips, assign drivers and vehicles, track every journey live and measure profitability per vehicle and per route.

- Live tracking for every charter & tour
- Trip planning & driver scheduling
- Vehicle profitability reporting
- Document, permit & FASTag management

Vehicle Rental

Keep every vehicle road-legal and accounted for between hires. Service history, document expiry, traffic challans and FASTag activity stay visible on one record per vehicle.

- Vehicle master with full service history
- Insurance, fitness & permit expiry alerts
- Traffic challan lookup per vehicle
- FASTag balance & toll transactions

School Transport

Keep every student accounted for from gate to gate. Live bus tracking, boarding attendance, route and trip management, and automatic alerts to parents.

- Live bus tracking for parents and admins
- Student boarding & drop-off attendance
- Route, stop and trip scheduling
- Driver & vehicle compliance records

One system instead of six spreadsheets

Tracking, trips and drivers, fuel and workshop bills, tyres, and the paperwork that keeps a vehicle legal. All of it filed against the same vehicle record, which is the only reason the numbers add up later.

- | | |
|--|---|
|  Live GPS Tracking <p>One map, every vehicle, moving as they move. Click any of them to follow that trip on its own.</p> |  Trip & Route Management <p>Set a route up once, with its stops and timings. Every morning after that is a copy, not a rebuild.</p> |
|  Driver Management <p>Who is driving what, who is on duty, who is on leave. Licence expiry sits on the same record.</p> |  Fuel & Energy <p>Every fill-up and charging session goes against a vehicle. That is where mileage and running cost come from.</p> |
|  Maintenance & Service <p>Service due by date or by odometer, so the workshop visit is one you booked rather than one that happened to you.</p> |  Tyre Management <p>Fitment, rotation, removal. Usually the second biggest running cost after fuel, and the least tracked.</p> |
|  Compliance & Documents <p>Insurance, fitness, permits, pollution certificates. Filed with their expiry dates so none of them lapse quietly.</p> |  Attendance & Passengers <p>Who boarded, who did not, and where each of them got off. Recorded against the trip.</p> |
|  Instant Notifications <p>Arrival, delay, route change. The office stops being the switchboard that relays all three.</p> |  Reports & Analytics <p>What a vehicle costs to run, and whether it earns more than that. Ready to export when someone asks.</p> |
|  Secure, Multi-Platform Access <p>Admins, drivers and customers each sign in to their own view of the same data, on web and on mobile.</p> |  AI Fleet Assistant <p>Ask it in plain English which vehicles are due for service, or what fuel cost last month. It answers from live data.</p> |

The apps your people actually use

DRIVER APP

Built for every fleet driver

The EduBB Driver App simplifies the daily routine of every driver — from school routes to long-haul trips. Drivers log trips, manage stops and pickups, and stay on schedule, all from their phone.

- ✓ **Trip logging** — no paperwork, no manual records
- ✓ **Stops & pickups** on a clear mobile list
- ✓ **Real-time updates** for schedules and route changes
- ✓ **Safety first** — emergency alerts and incident reports

PASSENGER & PARENT APP

Stay connected, stay informed

The EduBB app keeps parents and passengers connected to every journey. Follow vehicles live, get timely alerts, and always know when a pickup or arrival is on its way.

- ✓ **Live tracking** and accurate arrival expectations
- ✓ **Customizable alerts** for delays and route changes
- ✓ **Automated boarding updates** on board and exit
- ✓ **Trip history** with timings and routes

Android & iOS

Driver, parent and passenger apps

Any browser

Admin console, nothing to install

Role-based access

Everyone sees only their own work

One dashboard for the office

ADMIN CONSOLE

Command your entire fleet

Create and manage trips, assign routes and drivers, and stay on top of fuel, maintenance and compliance — all from one dashboard. Detailed reporting turns day-to-day operations into data-driven decisions.

- ✓ **Live monitoring** and real-time vehicle tracking
- ✓ **Trip, route and driver** control in one place
- ✓ **Fuel, maintenance, tyre** and compliance tracking
- ✓ **Cost, profitability** and utilisation reports

GETTING STARTED

From sign-up to your first live trip

01

Load your fleet

Add vehicles, drivers and documents — or import the lot in one go.

02

Set routes & trips

Build stops, schedules and driver assignments once, then repeat them daily.

03

Drivers go live

Trips start from the driver app and the office sees every vehicle move.

04

Read the numbers

Fuel, maintenance and cost-per-km reports build up from day one.

Know what every vehicle actually costs you

Reports & analytics

- **Vehicle-wise expense** — fuel, maintenance and tyres per vehicle
- **Profitability report** — revenue against running cost, per vehicle
- **Mileage comparison** — spot the vehicles drifting off their norm
- **Fuel consumption analytics** — trends, leakage and outliers
- **Maintenance summary** — where the workshop spend goes
- **Export to Excel or PDF** — every report, ready to share

Compliance, always current

- **Document vault** — insurance, fitness, permit and pollution certificates
- **Expiry alerts** — see what lapses this month before it does
- **Traffic challans** — synced per vehicle, with documents attached
- **FASTag** — balance, toll transactions and vehicle-wise activity
- **Tyre lifecycle** — fitment, rotation and removal history
- **Audit trail** — every change recorded against a user

Every figure above comes out of work your team already does — logging a fill-up, filing a service bill, closing a trip. EduBB just books it against the right vehicle, so the month-end review is a report to read rather than a spreadsheet to rebuild.

RESULTS

What operators get out of it

LOGISTICS

₹6.2L

annual fuel cost saved

A regional carrier logged every fill-up and tyre change, watched cost-per-km per vehicle, and found three under-performing trucks in the first quarter.

TRAVELS

+22%

fleet utilisation gain

Per-vehicle profitability reports showed which coaches made money. The operator retired two loss-makers and re-priced three charter routes in one season.

SCHOOL

70%

fewer enquiry calls

Across 24 buses, parents could follow every route live and got automatic boarding alerts — so the transport office stopped fielding “where is the bus?” calls.

COMMONLY ASKED

Before you ask us

How does live tracking work?

Every active trip reports its position to EduBB, so the office sees the whole fleet on one map and can follow any vehicle. Stops and route progress are recorded against the journey, so you get a history rather than just a current position.

What about FASTag and challans?

Insurance, fitness certificates and permits are stored with their expiry dates, and EduBB also tracks FASTag activity and traffic challans — so expiries and pending fines surface before they become penalties.

Can I really get cost per kilometre?

Yes. Log each fill-up or charging session against a vehicle and EduBB works out mileage and running cost. Combined with tyre and maintenance records, that gives a cost-per-km figure per vehicle you can act on.

Is our data safe?

Access is role-based, so admins, drivers and customers each see only what is relevant to them on web and mobile. Data is retained only as long as needed to provide the service. Full details are in the privacy policy.

Put your whole fleet on one platform.

Whether you run trucks, coaches, rental cars or school buses, EduBB gives you live visibility, tighter costs and compliance you never have to chase. Book a walkthrough and we will set it up around your fleet.

Book a demo

A 30-minute walkthrough on your own routes and vehicles — not a canned tour. Online or at your office.

Scan the code, or call +91 80891 20402

Ask for a quote

Tell us your vehicle count, how many people need logins and which modules you want — we send a written quote.

edubb@techbysoul.com

Pricing is worked out per fleet, so you only pay for the vehicles, seats and modules you actually use.

WHAT HAPPENS NEXT

01

Tell us about your fleet

Vehicle count, routes and who needs access — enough for a quote and a demo built around you.

02

Trial with your fleet

We load your vehicles, drivers and documents so you can judge it on real data.

03

Go live

Driver training, admin handover and support through the first month.
